Gladhand Filter**

**MERITOR WABCO**

*Safety Strong. Efficiency Smart.*

## For Trailer Anti-Lock Braking System (ABS) Valves.

Maintaining clean airflow without contamination is essential to any trailer braking system's performance. Trailer air filtration from Meritor WABCO protects your trailer's ABS valves, ECU valve and air brake system from contaminants, while maximizing trailer uptime. Our in-line filter, for example, is a control line filter designed to protect your ECU valve, yet it can be used to protect the supply line as well. The key function of our filters is to prevent damaging particles from reaching the trailer's air brake system. When tractor and trailer are connected, compressed air from the tractor flows to the trailer's air brake system, carrying dirt particles that come from the tractor's air system or open gladhands. Our filter traps these particles, as small as three- to five-thousandths of an inch, before they can flow through, so that only clean air is sent through the trailer air system.

### Clean airflow is essential.

An airflow bypass is one of our standard features. If the filter becomes clogged, the filter cartridge is pushed upward and air will flow unfiltered through the housing during both the "apply" and "release" phases, maintaining normal trailer-braking performance.

Regular cleaning of the filter is required, with additional cleaning needed depending on operating conditions. Both filtration options offer easy removal of the filter cartridge for cleaning.

### Features and benefits.

- Filters can be nipple-mounted directly to the gladhand
- Simple installation with easy access for servicing
- The in-line filter has minimal impact on FMVSS-121 application/release timing requirements
- Will not interfere with the build process
- Easy servicing of the filter cartridge
- Warranty extended to 4-Years/400,000-Miles parts only on the ABS modulator valve (reference SP-1375 for further warranty details)

Description	OEM Part	Service Part	Service Kit (cartridge and O-ring)
In-Line Filter	432 500 005 0	S432 500 005 0	R955366
Gladhand Filter (Red)	952 201 018 0	S952 201 018 0	N/A
Gladhand Filter (Blue)	952 201 019 0	S952 201 019 0	N/A
Label	899 201 842 4	S899 201 842 4	N/A

## Don't take chances. Install Meritor WABCO trailer air filtration components.

Engineered and manufactured by a recognized industry leader, these OE-quality products provide the same form, fit and function as original parts and are part of the proven Meritor® All-Makes Air Systems program (Catalog PB-8857AS).

### Service and support.

All Meritor WABCO commercial vehicle aftermarket products are backed by comprehensive world-class service and support – provided throughout North America by our industry-leading customer service team. Online information and parts ordering are available 24/7/365 at MeritorPartsOnline.com.

For more information, call our OnTrac Customer Service team at 866-OnTrac1 (866-688-7221) or visit [www.MeritorWABCO.com](http://www.MeritorWABCO.com).
